

Steps for validating signature in the output certificate:

Step 1: Open the certificate (PDF file).

Step 2: user has to click on the digital signature in the certificate. A pop up called “Signature Validation Status” will open.

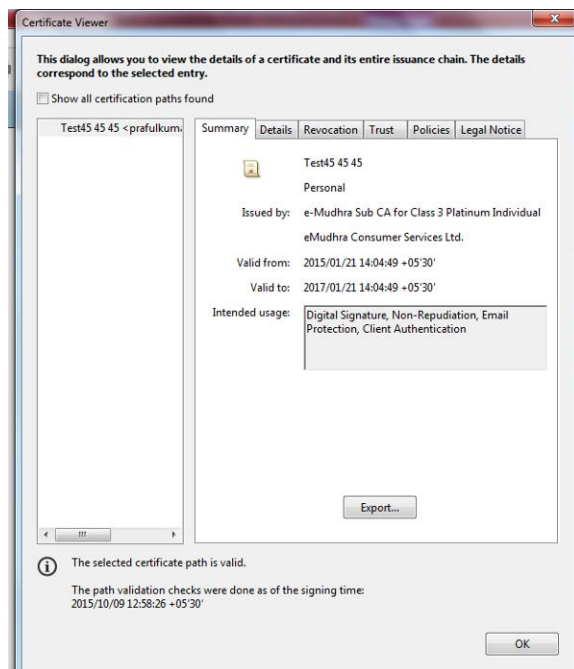

Step 3: User has to click on the “Signature Property” button from the pop up.

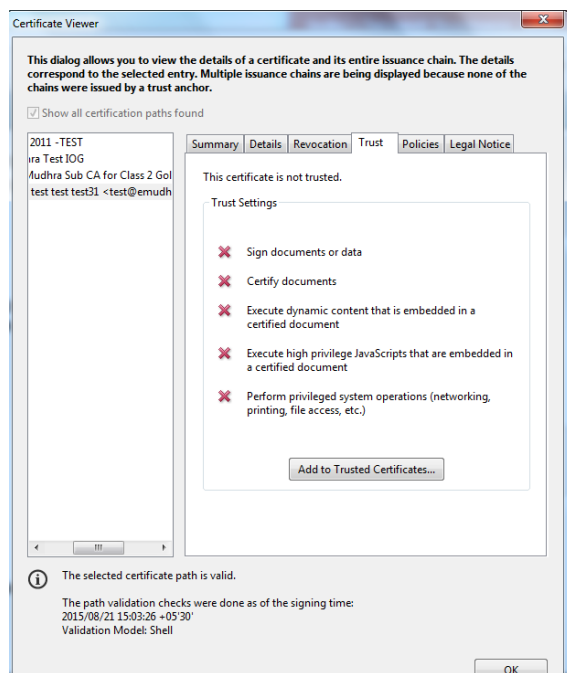

Step 4: User has to click on the “Signature Property” button from the pop up and a new pop up called “Signature Property” will open.

Step 5: User has to click on the “Show Signer’s Certificate” button from the pop up and following screen will appear.

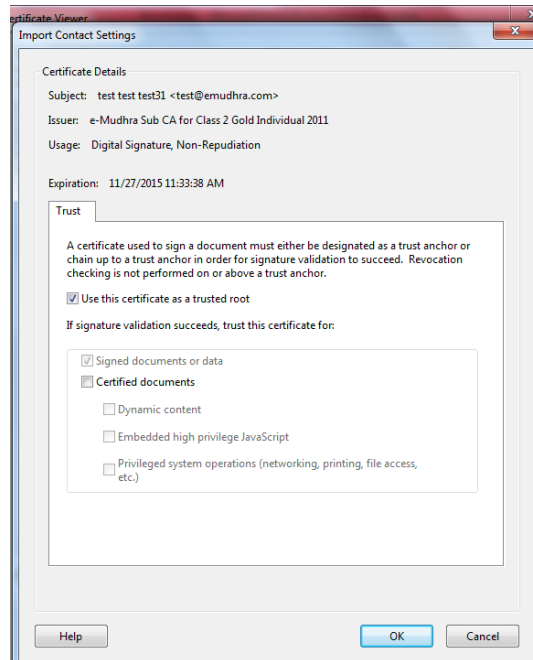

Step 6: User has to click on the “Trust” tab from the pop up and following screen will appear.

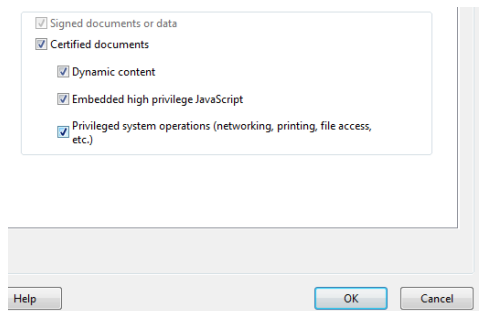

Step 7: User has to click on the “Add to Trusted Certificates” button and following pop up will appear.

Step 8: User has to click on the “Ok” button and following pop up will appear.

Step 9: User has to select the check boxes and click on ‘Ok’ button.

Step 10: Now close the PDF file and reopen again.
